EXPERIENCES

Hackathon Participant

05/2022

Vicenza, Italy

- I worked in a small team over the weekend, focusing on interpersonal communication and developing a ready-to-deploy product through fast iterative design
- I developed a mobile application with engaging user experience
- We researched widely adopted industry engagement models and engineered a winning solution for the project

System Developer

05/2023 - Today

Iotinga s.r.l.

- I wrote and maintained a custom CI/CD system: infrastructure, frontend and backend
- I worked on multi-platform mobile apps and their backend, tailored to clients' needs
- I developed embedded device firmware and backend for (experimental) industrial automation projects

EDUCATION
